🔗 Portfolio

Summary

Motivated Information Technology student with strong problem-solving skills and an interest in software development, web technologies, and artificial intelligence. Eager to learn new technologies and contribute effectively in a professional environment.

Skills

Programming

Java, Python

Frameworks

React.js, Node.js

Technologies

HTML, CSS, NLP

Databases

MySQL, MongoDB

Certificates

- MongoDB Basics for Students
- Machine Learning using Python - Simplilearn
- Oracle Academy - Database Design

Volunteering

Organized InnoQuest event as a member of Computer Society of India

Area Of Interest

Full Stack Development and Artificial Intelligence

Education

B Tech - Information Technology

National Engineering College

CGPA - 8.18 (upto 5th semester)

HSC

Edustar International School - CBSE

Percentage - 82 Year - 2022

SSLC

Esaki Vidyaashram School - CBSE

Percentage - 86 Year - 2020

Projects

Online Course Feedback System

Technology used : Mern Stack

Developed a MERN Stack web application to automate course feedback collection and analysis for educational institutions. Implemented role-based authentication, centralized course management, structured feedback submission, CSV upload, email notifications, and analytical reporting to improve efficiency and data management.

GitHub [🔗](#)

versel [🔗](#)

Application Development Code Snippet Generator Agent

Technology used: Python and Large Language Models (LLMs)

Developed an AI-powered desktop application using Python and LLM integration to generate code snippets and explanations from natural language prompts. Implemented OpenRouter API integration, secure authentication, multilingual support, conversation history management, and interactive Tkinter GUI.

Internship

Prodigy Info Tech -Machine Learning

Worked on data preprocessing, exploratory data analysis, and implementation of machine learning models using Python libraries such as NumPy, Pandas, Matplotlib, and Scikit-learn.

CodSoft - Artificial Intelligence

Developed AI-based Python projects including chatbot systems, Tic-Tac-Toe AI using decision-making logic, and a movie recommendation system using machine learning concepts.
